

ONFLEET FOR PHARMACY

How Pharmacy Operations Teams Scale Delivery Without Losing Control

The Challenge

Speed, compliance, and patient care are all on the line with every delivery. Most operations hit a ceiling when those demands outpace their processes.

How Onfleet Solves This

Route Optimization Built for Tight Delivery Windows

AI-powered routes optimized in minutes, with live traffic updates and automatic adjustments throughout the day.

30-60 min → 5-10 min per route

Patient Notifications That Reduce Failed Delivery Attempts

Automated SMS updates with live tracking and a one-hour arrival window to reduce failed deliveries.

50% less failed deliveries

Proof of Delivery That Matches Every Compliance Requirement

Photo, signature, ID verification, and GPS timestamps captured automatically in the driver app.

Narcotics, cold-chain & standard orders

Reporting That Holds Up Under Audit

Access on-time rates, chain-of-custody records, and complete delivery history in seconds.

Audit-ready, always

When volume demands outpaced their manual process, Bayshore turned to Onfleet to scale without breaking.

300 → 2,000 orders/day

83% faster route planning

90% on-time rate maintained

"The features, everything is just very seamless for the team. It's easy, right? It's not something that you have to break your head over. If you understand English, I think you could pretty much just use Onfleet."

Daniel Akinniyi, Logistics Manager, Bayshore HealthCare

COURIERS YOU CAN TRUST

Scale Capacity Instantly by Tapping Into Onfleet's Network

The Capacity Problem

Volume spikes, sick call-outs, and new market launches often require more delivery capacity than pharmacy teams have available. But finding vetted couriers who understand medical delivery compliance is difficult, and the wrong provider can create compliance risks, missed deliveries, or even suspension issues.

How Onfleet Solves This

Onfleet connects you to vetted, trusted pharmaceutical couriers already operating on the platform, held to the same compliance standards as your internal fleet. Here is one of them.

ABD built their operation around the compliance standards larger pharmacy clients require: employed drivers, company-owned vehicles, and background checks every six months. With Onfleet, they could finally prove it to prospects. Failed deliveries dropped from 22 to 4 per day, and patient calls went from 8-10 daily to almost none.

82% fewer failed deliveries

WISMO calls → near zero

\$1,500/mo toll savings

"Don't hesitate to get Onfleet. I think it's the best provider in the market right now. For pharmaceutical delivery, it's very good because of the documentation."

Abdul Daas, , CEO, ABD Transportation

Third Party Delivery Network

Manage internal drivers and external courier partners from the same dashboard — same visibility, same compliance controls, same reporting. Scale up when you need to, without losing control.
